INTERNET SERVICES

Standard rates will apply to all orders placed less than 14 days prior to the first move-in day.
On-site rates will apply to all orders placed after load-in and setup have begun.

Service Methods – There are two methods for providing networking services.
1) **Wi-Fi:** 2.4 and 5.0 ghz are supported.
2) **Wired:** Huntington Place provides a network cord and port.

NOTE: **(DHCP is automatically provided unless a public static IP is requested)**

Networking Service Types
There are four different service types to choose from.

1) **Dedicated:** This service is a private network that only you can access and has no blocks on anything, meaning all network traffic gets through. Wi-Fi option available with this service. SSID and Password will be required.
2) **Dark/Dry:** This service is private as well but you or your team will manage it instead of our in-house team.
3) **Shared:** This service is NOT private. It allows only one device per drop and shares your bandwidth with whomever else has purchased the shared service for that day. No Wi-Fi option is available with this service. Additional drops are not available with this service.
4) **Streaming:** This is a private network, but EVERYTHING (all network traffic) is blocked except for streaming services (no email, chatting, browsing, etc.).

Rates shown are one-time costs for the entire duration of the event. Please see it on next page.

Orders must be submitted online with credit card payment.
As of 08/07/2025 each order will incur a 3.5% credit card fee.
